

# Allow ScreenConnect on a Mac

1. Select the “Request Access” button under “Screen Recording”

2. Click “Open System Settings” button.

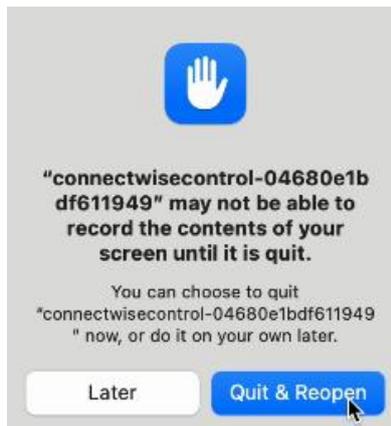

3. Switch to **enable** the ConnectWise control app under **Screen Recording** in **Privacy & Security**

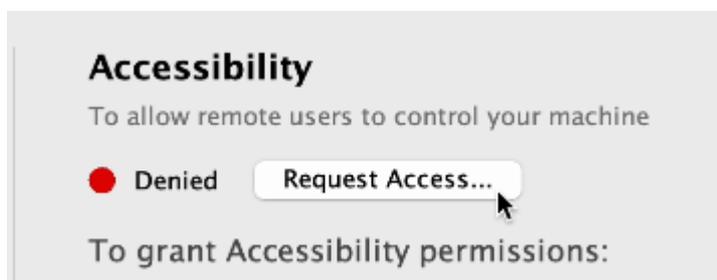

4. Enter the Mac admin password and select “**Modify Settings**”

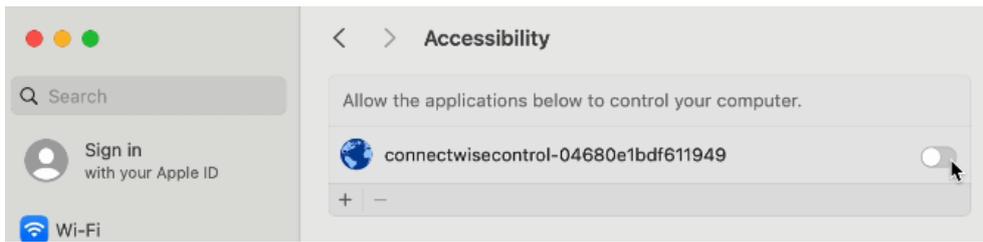

5. Press “**Quit and Reopen**” button

6. Now click “**Request Access**” button under **Accessibility**

**7. Switch to turn on the same again, but under **Accessibility** within **Privacy & Security****

***The remote access software is now successfully installed – you can close any open windows.***
